Carmine Colella, CEO of Sostravel.com stated:

"The agreements for the sale of the Lost Luggage Concierge service, signed at the end of 2024, are beginning to have a positive impact on turnover and margins, giving us the right boost to continue our growth in new markets in what we consider to be the most scalable and profitable business unit. The travel division is maintaining the good results achieved in 2024, even though this Business Unit has been involved in three major changes since the beginning of the year: i) at a strategic level, we have almost halved the risk volumes of empty rooms for properties, favoring an increase in agreements for hotels and resorts available for sale; ii) strategic commercial consulting has been introduced for the sale of stays in a property in Sardinia; iii) the technology platform for the sale of all-inclusive travel packages has been changed."

*The Gross Booking Value (GBV) is a financial indicator that measures the total value of transactions made through a platform or booking system before any deductions, such as taxes, discounts, or cancellations. GBV represents the gross sales volume generated and is used to evaluate a company's performance in the e-commerce and travel industries.
